Projects

Quiz-app

<https://github.com/Bhagyashri537/quiz-app>

- Built a dynamic quiz app using React.js with component-based architecture and API integration for fetching questions.
- Created a responsive UI with CSS, delivering real-time feedback on answers and a smooth user experience across devices.
- Utilized React Router DOM for seamless navigation between home, quiz, and result pages.
- Managed version control on GitHub, showcasing proficiency in Git for tracking and sharing code.

Disney Clone

<https://github.com/Bhagyashri537/disney-clone>

- Built a Disney+ clone using React.js, creating a clean and modular component structure to replicate the streaming platform's interface.
- Designed a responsive and visually appealing UI with CSS, ensuring a consistent experience across different devices and screen sizes.
- Integrated dynamic content rendering, allowing for seamless display of various sections like Home, Movies, and TV Shows within a single-page application.
- Managed the project with Git and GitHub, showcasing skills in version control and collaborative development practices.
